Comments for Olivier Binette

Amazing TA!

Olivier was my assigned lab TA and deeply, deeply cared about the students' well-being and their grasp of the content. His lab slides were extremely helpful, and he was great to break down the difficult subject matter of STA 360.

I didn't have much in-person interaction with Olivier, but he answered many questions on Piazza in a timely manner, and he gave detailed, helpful responses. He also created PowerPoint slides for lab material that were extremely useful for navigating the lab and homework assignments, and he seemed overall very interested in helping students engage with the course.

Olivier was really timely and responsive whenever I had a question on the material, and I really appreciate that. The only thing that I would offer as constructive feedback is that sometimes when he would show us his lab code, it would be very different from Professor Steort's code. While I appreciate the value of seeing code written in different ways, seeing different notation and code used on the same problem would sometimes be confusing as I was just learning a concept and not too familiar with the material. Overall Olivier was a great TA this semester.

Really cared about his students and did excellent work in making sure we understood the material.

Extremely knowledgeable and helpful with the material. It was only a little bit confusing when his code would be different from the lecture code, but other than that, I really enjoyed his lab sessions and they were super informative.

Olivier is great at conveying material clearly and being readily available for students.

Always willing to answer questions in lab and office hours, gives great explanations of course concepts and is very friendly

Great Lab TA

Olivier is an excellent TA! The slides that he prepares for our lab sections are always thoughtful and capture the key concepts from the course that week. I always feel more comfortable with the course material after Olivier's labs. I really appreciate all of the effort he puts into them! Olivier is also very approachable outside of class and offers to answer any questions that may come up.

Olivier is a great TA. He's super approachable and is super knowledgeable. Really helps to explain concepts thoroughly!

Always made sure to stop to allow clarification questions in lab. Very knowledgeable and approachable.

Olivier is an outstanding TA! His labs and office hours are always very organized and helpful; he makes all the lab slides (which were very well-made and super useful for studying and reviewing content), makes sure everyone understands what he explains, and explains concepts in an intuitive way. He's really great at answering questions clearly+accurately and breaking down difficult concepts into understandable pieces; I definitely learned a lot from him. He definitely cares a lot about the students and teaching, invests a lot of time in the class, and is very approachable. Olivier is super knowledgeable, has a great teaching style, and did an incredible job this semester!

Explains everything super well and in an easy to understand manner.

Olivier is phenomenal. He has a mastery of the course material, is great at teaching, is organized, and stayed upbeat even when students weren't very responsive during lab. He evidently has his students' best interest in mind.
